DYS Admissions Screening for
Prevention of COVID-19 Transmission

Revision Effective March 25, 2020

Youth Name: _________________________ Detention Center/CCF: _________________________

Date of Screening: _____________________ Time of Screening: __________________________

*Each youth being transferred to a DYS facility shall be asked the following questions by a healthcare provider prior to transporting to DYS or CAS.

1. *Has the youth had symptoms of respiratory infection within the past 72 hours (fever, cough, shortness of breath, or difficulty breathing)?*
   - ☐ NO – Proceed to question 2.
   - ☐ YES – Yes, but the cough is mild, chronic, and of known cause (asthma, COPD, chronic sinusitis etc.) - proceed to question 2.
   - ☐ YES, all other reasons – The youth will not be permitted to be transported to a DYS facility. A request to transport to a DYS facility may occur WHEN:
     - A physician has determined that the cause of the fever is NOT COVID-19 and approves, in writing, transport to a DYS facility
     - OR:
       - Seven (7) days have passed since onset of symptoms; and
       - Three (3) days (72 hours) have passed with no fever and youth has not been taking medication to reduce fever, like Tylenol; and
       - Three days have passed since respiratory symptoms improved.

2. *Has the youth traveled outside of the United States within the past 14 days, or been exposed to someone with confirmed COVID-19?*
   - ☐ NO – Proceed to question 3.
   - ☐ YES, and non-symptomatic (fever, cough, shortness of breath or difficulty breathing) – Youth shall not be transported to a DYS facility. Youth should be in quarantine for 14-days from the time they were exposed to confirmed COVID-19 OR left the impacted area. If fever develops during the quarantine period, go to next bullet.
   - ☐ YES, and exhibiting flu-like symptoms like fever, cough, shortness of breath, difficulty breathing.
     - Youth shall not be transported to a DYS facility and should be placed in medical isolation. A request to transport to a DYS facility may occur WHEN:
       - A physician has determined that the cause of the fever is NOT COVID-19 and approves a transport to a DYS facility;
       - OR:
         - Seven (7) days have passed since onset of symptoms; and
• Three (3) days (72 hours) have passed with no fever and youth has not been taking medication to reduce fever, such as Tylenol; and
• Three days have passed since respiratory symptoms improved.

3. Take the youth’s temperature to see if the youth has a temperature of 100.4 degrees Fahrenheit or greater.

☐ NO – If no, the facility may request the youth be transported to DYS. TEMP: ______________________

☐ YES – The youth will not be permitted to be transported to a DYS facility. A request to transport to a DYS facility may occur WHEN:
  • A physician has determined that the cause of the fever is NOT COVID-19 and approves a transport to a DYS facility;
  OR:
  • Seven (7) days have passed since onset of symptoms; and
  • Three (3) days (72 hours) have passed with no fever and youth has not been taking medication to reduce fever, like Tylenol; and
  • Three days have passed since respiratory symptoms improved.

List of All Medications taken in the last 24 hours:
